MAKING WAY FOR NEW PLAYGROUND AT FRANCES ANDERSON CENTER

PLEASE PARDON OUR MESS AND NOISE!

Beginning the last week of April, contractors will be on site at the Frances Anderson Center to dismantle the current playground to make way for a brand new playground!

The new playground will be built in the current playground location with a slightly larger footprint. This new playground will accommodate all of the age group elements and give a bright new look to the east side of the FAC adjacent the new band shell.

According to Rich Lindsay, Parks Maintenance Manager, a security fence will be installed all the way around the playground project site as a cautionary measure to make the site safe and secure during the dismantling and installation period of April 30 – May 31.

Residents who would like to see a rendering of the newly purchased playground can find a link on the City of Edmonds website, under Parks, Recreation and Cultural Services.
