Public Meeting

220th Street SW Overlay & Bike Lane Project

(Edmonds - WA) The City of Edmonds will be presenting a preliminary design concept for the 220th Street Overlay Project at 6pm, April 16, 2015, at Edmonds Church, 8224 – 220th St SW, Edmonds, WA 98026.

The project involves a full-width roadway grind and 2-inch overlay with new pavement between 84th Avenue and 76th Avenue. The project also proposes to add bike lanes on 220th St. to connect to the existing bike lane network east of 84th Avenue. Adding bike lanes will modify the existing lane configuration and on-street parking within the project limits. Pedestrian curb ramps will be upgraded to comply with the current American with Disabilities Act (ADA). A second, unrelated pavement project will extend the overlay eastwards from 76th Avenue to the Interurban Trail.

Construction is anticipated to begin in summer 2015. Intermittent traffic delays can be expected, but residential, pedestrian, and business access will be open throughout the project.

The City was successful in securing a \$780,000 federal transportation grant to help fund the project. Last overlaid in mid 1990s, the roadway has several failed sections with longitudinal cracks and rutting. Utility patches from past projects have also contributed to the current overall condition.

For questions or comments, please contact Ed Sibrel, Capital Projects Manager, at (425)771-0220 or via e-mail.
