Construction of the 2015 Sanitary Sewer Replacement Project

(Edmonds - WA) The City of Edmonds 2015 Sanitary Sewer Replacement Project is scheduled to begin construction the week of June 8th, 2015. The project will replace or repair existing sewerlines at four different locations within the City.

The project locations are:

- 9th Avenue S from Alder Street to Walnut Street & Walnut Street from 9th Avenue S to 96th Avenue W
- Brookmere Drive (north/south segment) from Caspers Street to curve in road
- 5th Avenue S from Dayton Street to alley south of Main Street
- Cascade Drive

For reference, an overall site map is also attached.

The sanitary sewers need to be replaced due to increased conveyance needs, pipe age, and maintenance. During the construction time period, we do not expect any road closures, but construction will affect the traffic lanes and flow of traffic at the various site locations. The contractor will provide sewer diversion so service shut offs are not anticipated.

If you should have any questions regarding the project, please contact Henry Schroder, Project Manager at (425)-771-0220.
