COMMUNITY MEETING FOR EDMONDS STREET WATERFRONT CONNECTOR February 28th, Edmonds Library, Plaza Room

(Edmonds - WA) Join us February 28th from 6pm-8pm, at the Edmonds Library, Plaza Room, (650 Main Street, Edmonds, WA) to share your feedback on early design concepts!

The Waterfront Connector will be a long-term solution to the at-grade railroad crossing conflicts at Main and Dayton Streets, allowing pedestrians and emergency vehicles safe and direct access to the waterfront.

In 2016, after receiving significant input from the community, the City completed the Waterfront Access Study. The study looked at a number of alternatives to provide safe and reliable access over the railroad tracks to the waterfront. The analysis conducted during that study recommended the Edmonds Street Waterfront Connector as the preferred solution. Mayor Earling presented this recommendation to City Council who unanimously endorsed the project in November 2016.

You can learn more about the project and share your thoughts in-person on February 28th or online February 28th – March 16th. The online open house will be at:
