## **76<sup>th</sup> Ave and 212<sup>th</sup> St. Intersection Improvement Project**

**(Edmonds - WA)** The final pavement and paint striping work at the intersection of 76<sup>th</sup> Ave and 212<sup>th</sup> St. is scheduled for this summer (tentatively July). The paving and striping work was scheduled for spring of this year, but the work was postponed due to settlement issues in the existing pavement during this past winter. Some of the pavement repair work has been completed and the remaining repairs will be incorporated into the final pavement restoration. The City used the extra time to monitor the site to make sure no additional settlement issues appeared within the project limits.
