84th Ave. W Overlay project from 220th St. SW to 212th St. SW

(Edmonds – WA) Construction on the ***84th Avenue Overlay Project*** will commence in early September of 2019, and be completed by November (weather permitting).

The project involves a full-width roadway grind and 2-inch overlay with new pavement between 212th St. SW and 220th St. SW. The project also proposes to add bike lanes on both sides of the street from 215th St. SW to 212th St. SW and sharrows from 220th St. SW to 215th St. SW, in order to connect to the existing bicycle networks along 220th St. SW and 212th St. SW. The addition of bike lanes will modify the existing lane configuration and remove on-street parking on the east side of 84th Ave. W from 215th St. SW to 212th St. SW. Pedestrian curb ramps will be upgraded to comply with the current American with Disabilities Act (ADA) standards. Pedestrian safety improvements will be incorporated into this project through the installation of pedestrian-actuated rectangular rapid flashing beacons (RRFB) at the crosswalk directly in front of the Chase Lake Elementary School and a bulb-out at the 215th St. SW crosswalk. Stormwater improvements will be completed from 220th St. SW to 215th St. SW, including upsizing the stormwater line to a 12” pipe and upgrading the catch basins.

Intermittent traffic delays can be expected, but residential, pedestrian, and business access will be open throughout the project. The project is being funded by a federal transportation grant and local funding from the stormwater utility fund and real estate excise tax.

For questions or comments, please contact Jaime Hawkins, Capital Projects Manager, at (425)771-0220 or via e-mail at jaime.hawkins@edmondswa.gov.
