Dayton Street construction update: Crosswalk repairs and intersection closures on Dayton Street

(Edmonds, WA) Dayton Street construction project crews made great progress in the last week paving 5th Avenue between Maple and Main Streets. However, the project takes a small step back this week to repair one recently installed crosswalk. The special colored brick at 5th Avenue and Dayton Street did not meet City specifications and will be removed and reinstalled.

The entire intersection will be closed June 3-4 with the west leg of the intersection closed from the morning of June 3 to the afternoon of June 5.

During this work you can expect:

- The Dayton Street and 5th Ave intersection to be closed during the work day of June 3 and June 4.
- Vehicle traffic will be able to access the north, south, and east legs of the intersection during non-working hours.
- Vehicle traffic on the west leg of the 5th Ave intersection will be restricted from the morning of June 3 to the afternoon of June 5
- Vehicle access to businesses, driveways, and parking lots leading to the intersection will be maintained during work hours
- Sidewalk access is allowed, but the western crosswalk at the 5th and Dayton intersection will be closed; pedestrian detours will be in place

Looking ahead

Workday road and intersection closures are expected in the near future for Dayton between 6th and 9th and intersections as the project gets closer to completion. Once all the road paving is complete, crews will return in late June and into July to stripe the road.

Please keep in mind this work is weather-dependent and the schedule is subject to change. We will continue to provide updates on the work schedule as adjustments are made.
